

*All about identity*

## PYLON SIGNS

## Pylon Signs

**Pylon signs** and **monolith signs** are available in a range of shapes and sizes and provide **effective exposure** from the street to passing traffic.

**Pylon signs** are the **gateway** to your business and the **first impression** visitors see when approaching your site. Smart businesses recognise the importance of **strategically designed and located** pylon signage in **raising the visibility** of their brand and **maximising the potential** of passing trade.

Due to their larger-than-life presence, pylon signs **attract attention** and can be seen across busy highways, motorways, and streets, making a bold statement for your brand.

**Pylon signs** can be **custom made** in a range of sizes and styles, using various materials and lighting effects, including internal or external illumination and the inclusion of LED display screen's. Options include:

- **Single pole**
  - Simple, cost-effective solution to increase your visibility and branding
  - Ideal for high-rise buildings for wide-ranging visibility.
- **Twin Pole**
  - Ideal for multiple signage panels
  - Highly prominent pylon sign.
- **Covered Monolith**
  - Covered or Clad structure
  - Ideal for covering structural support
  - Custom-made in a range of shapes and sizes.

Our **monolith signs** are another freestanding sign option, and although similar to pylon signs, are more architectural in design and style. **Monolith signs** can also be incorporated with way finding to **provide directions** and with the added benefit of illumination to **way finding signage**.

At **Albert Smith Signs**, we provide all our signage services to the **highest standards** to meet and exceed customer expectations.
